

Mauricio Rostagno

ANALYTICS ENGINEER

San Salvador de Jujuy, Argentina (UTC-3) · mrostagno8@gmail.com · [LinkedIn](#) · [Portfolio](#) · [GitHub](#)
Spanish (Native) · English (C1)

SUMMARY

Analytics Engineer with nearly 4 years in data, moving from BI and analysis to production data pipelines. Builds pipelines, data models and dashboards on BigQuery, dbt and GCP/AWS. Experience in HR tech, e-commerce, consumer goods and energy.

SKILLS

Languages: SQL, Python

Warehouse & Lakehouse: BigQuery, Databricks, Delta Lake, PostgreSQL

Transformation & Orchestration: dbt, Spark (PySpark), Airflow, Dataflow

Cloud & Infra: GCP, AWS (CloudWatch, S3), Terraform, Docker

Quality & CI: dbt tests, GitHub Actions, Git

BI: Looker, Looker Studio, Power BI, Tableau, Qlik

WORK EXPERIENCE

Data & MLOps Analyst (Contract)

Apr 2026 – Present | Caramel Point, DinoCloud team · client: Edenor

- Built 13 AWS CloudWatch alarms (9 in production) that detect accuracy drops, stale outputs and incomplete runs in ML models and their pipelines.
- Write the alarms as infrastructure as code (Terraform, Terragrunt) for dev and prod, reviewed and deployed by the platform team.
- Maintain 6 Qlik dashboards used by Edenor teams to manage service claims and outages.

Data Engineer (Contract)

Dec 2025 – Jun 2026 | Quales · client: Mercado Libre

- Automated 8+ pipelines migrating data from Google Sheets, MySQL and BigQuery, replacing weekly manual loads.
- Detected and fixed 12+ critical ETL errors in BigQuery and Dataflow before they reached Tableau and Looker dashboards.

Data Analyst (Contract)

Aug 2025 – Dec 2025 | esolutions · client: CCU

- Built 6 sales dashboards in Looker Studio that replaced 50+ hours of manual reporting per week.

Data Analyst

Dec 2022 – Jul 2024 | Jobint (Hiring Room)

- Cut BigQuery query costs by 15% by partitioning the largest event tables by date and clustering them on the most filtered fields.
- Built a churn prediction model in Python with 82% accuracy.
- Improved candidate filtering efficiency by 30% with an analysis of user interaction patterns.

Provincial Accounts Analyst

Jan 2022 – Dec 2022 | Provincial Directorate of Statistics and Censuses, Jujuy

- Cut report processing and publishing time by 40% by automating repetitive tasks, and trained the team in Power BI.

PROJECTS

- CitiBike Lakehouse** (Databricks, PySpark, Delta Lake, dbt, GitHub Actions): streaming and batch lakehouse over live NYC bike data. Runs hourly with 44 dbt tests and CI on every pull request.
- Fakecommerce Pipeline** (Airflow, dbt, PostgreSQL, Docker): API to PostgreSQL to a dimensional model in dbt. Around 36 tests stop bad data before it reaches the dashboard.
- BigQuery Cost Auditor**, in development (Python, BigQuery): flags cost waste in a BigQuery project using only INFORMATION_SCHEMA metadata.

EDUCATION

Industrial Engineering | National Technological University (UTN) · 2011 – 2020

Business (Digital Transformation) | Greenwich College, Sydney · 2024 – 2025

CERTIFICATIONS

Associate Data Engineer in Databricks (DataCamp, 2026) · Professional Data Engineer with Python (DataCamp, 2026) · Machine Learning on Google Cloud Specialization (2025) · Serverless Data Processing with Dataflow (Google Cloud, 2024)
